PREFACE

This is a list of plants officially approved by the Agricultural Marketing Service to receive grading service for poultry, shell eggs, rabbits, and mandatory and voluntary inspection service for egg products.

CONTENTS

Part I Pages 4-22

This part is a list, arranged by States, of officially approved plants receiving voluntary grading and inspection services on poultry, shell eggs, rabbits, and egg products under the Agricultural Marketing Act of 1946, as amended, and mandatory egg products inspection under the Egg Products Inspection Act (Public Law 91-597). The type of service each plant receives is specified by the following codes under the column head "Type of Service":

Code - PY	Poultry	Code - VEP	Voluntary Egg Products
Code - SE	Shell Eggs	Code - DE	Dried Eggs
Code - EP	Mandatory Egg Products	Code - R	Rabbits

Part II Pages 23-25

This part is a cross-index which lists official plant numbers in numerical sequence and shows the page numbers on which the plant names and locations can be found.

Part III Pages 26-40

This part is the Organizational Directory of the National Office, the Grading Branch Regional and State offices, and the Federal-State Market News Branch field offices of the Poultry Division.

National Office
Grading Branch Regional Field Staff
Grading Branch State Offices
Federal-State Market News Branch - Field Offices

GRADING BRANCH

The Grading Branch provides, upon request from applicants, voluntary resident and nonresident grading service on poultry, shell eggs, and rabbits, and voluntary inspection service on egg products not covered by the Egg Products Inspection Act (EPIA). The Branch also provides mandatory egg products inspection in egg products processing plants as required by the EPIA.

Voluntary grading and inspection services are authorized by the Agricultural Marketing Act of 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621 et seq.).

These services include contract and specification acceptance work and laboratory analysis. Official grading of product establishes a basis for a quality and price relationship, thus facilitating orderly marketing. Such grading also

BEST COPY AVAILABLE

enables buyers, including consumers, to confidently purchase officially graded product that is in compliance with the quality shown on the product label.

The EPIA provides for the production of wholesome egg products and controls the distribution of restricted eggs (i.e., dirties, checks, leakers, inedibles, loss, incubator rejects) so they do not enter consumer channels. Checks may be shipped only to USDA official egg products plants for proper segregation and processing. All other restricted eggs must be denatured, destroyed, or otherwise handled to prevent their use as human food. Mandatory, continuous USDA inspection is required in all egg products plants which ship in interstate, intrastate, or foreign commerce. The EPIA provides for the inspection of all imports of egg products and shell eggs.

COMMODITY PROCUREMENT BRANCH

The Commodity Procurement Branch carries out marketing programs involving surplus removal and school lunch purchases and provides economic and statistical services pertaining to these and other programs administered by the Division for shell eggs, egg products, poultry, poultry products, and rabbits.

STANDARDIZATION BRANCH

The Standardization Branch carries out programs relating to the development, promulgation, and revision of U.S. grade standards for shell eggs, poultry, poultry products, and rabbits; development, revision, and modification of purchase specifications for shell eggs, egg products, poultry, poultry products, and rabbits. The Branch develops public educational materials. It also develops policies for and coordinates the Division compliance and review and evaluation programs. The compliance program handles violations of the Agricultural Marketing Act, the EPIA, and the Agricultural Fair Practices Act and related regulations. The review and evaluation program involves monitoring the voluntary grading and mandatory inspection programs to evaluate the effectiveness of program controls.

MARKET NEWS BRANCH

The Federal Market News Service is authorized under the Agricultural Marketing Act of 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621 et seq.). Its principal function is to assemble, verify, and analyze market prices and other related market information; day-to-day marketing information; and to furnish specific "on the spot" trade information needed quickly for Government purposes.

EGG RESEARCH AND PROMOTION

The Egg Research and Consumer Information Act, as amended (7 U.S.C. 2701 et seq.), authorizes the American Egg Board to collect 5 cents per 30-dozen case of eggs from egg producers owning 3,000 or more laying hens. The monies collected finance nationwide generic advertising, promotion, research, and consumer education programs. The Poultry Division has the delegated responsibility to make sure that the law and implementing regulations are carried out correctly and that the program is operated in a manner that best serves all egg producers. Total expenses for this oversight responsibility are reimbursed by the Board.
